

DocuCard

Card Solutions

The Xerox DocuCard is a premium solution suitable for both mono and colour digital printing.

Xerox qualified 120gsm base sheet and a 178 micron synthetic card. The card itself is waterproof, tear-proof and highly durable making it suitable for membership cards, identification cards and loyalty cards where durability and a professional look are key factors. The card measures 86 mm x 54 mm.

The sheet and the card, (both sides), can be pre-printed with static information just leaving the variable printing to you.

DocuCard products can also be produced in customised configurations, subject to test approval.
